PERSONAL PROJECTS

Country Delight (React Js)
- Book your Order from anywhere of your required Materials (Milk, Fruit, vegetables, Juice, etc.)

TrailingCrypto (JavaScript)
- It is a Trading Platform and also can convert virtual currency from one to another.

GreenStone, RoyalApoThecary, CannaMobile, WestCost (Next Js)
- These are E-commerce project. Here we can order cannbe products with multiple address shop.
- I also implement 3rd party integration. eg. chatbox (it is kind of chat boat), Berbix (It is for verify user details like, Id card, photo etc.)
- https://greenstoneretail.com/
- https://royalapothecary.life/

Admins :- Anker Admin, Greenstone Admin, Hyperwolf Admin , Super Admin (React Js)
- These all admins are related to above cannbe projects and from here we can Edit product, user details, Track business progress, etc.

Enciser Admin (React Js)
- It is based on an Electricity Management system, here we can add electricity rates , sites , jobs, Tariff, and can manage complete tracking of user and their product.

Trenddii Admin (React Js)
- It is a kind of admin where we can create a game in a form of questions and get points to win rewards
