PERSONAL PROJECTS

Imagery Blog App (MERN Project)-
Link: https://ng-blogs.vercel.app/

- Random Image is generated and the user can write a title and description according to the image.
- I have created a backend with express and mongo dB that store the data you can create a account and log in.
- Also Add, edit, delete your blog, and view all other user's blogs

Portfolio (React Js Project)-
Link: https://neha-gupta-portfolio.netlify.app/

- This app is in Pure React js
- I have use react-awesome-reveal for Animation
- For styling, I have used styled component

COMPANY PROJECTS

Roaring Tiger:

- MERN Stack Project
- Build in from scratch
- Landing Pages and Admin panel in React js
- All the pages are integrated with the admin panel and Admin can manage all the pages

Preference App
Link: https://hereiswhatilike.com/
